

Forests without Borders Awards

Forests without Borders is an independent non-profit charity originally established by the Institute in 2009. Administered by the Institute, Forests without Borders is making progress in terms of both its fund-raising activities and with its objectives to advance forestry knowledge in Canada and abroad, and to help communities to rehabilitate and sustainably use their forest ecosystems and forest based resources. Two awards have been established to recognize those Sections who have most successfully raised funds for the charity.

This year's recipient of the *Pennies for Seeds* challenge award is **Vancouver Island Section**. This year's recipient of the most successful fund raising overall for Forests without Borders, for the second year in a row, is **Newfoundland – Labrador Section**.
